

A 4-part Lecture: “Diagnosis, CBCT, Disinfection, and Treatment Planning Synopsis”

Continuing Education Course

Presented By: **Robert S. Roda, D.D.S., M.S.**

Endodontist

www.endoaz.com

6 credits of Continuing Education (Nevada & California)

Friday, March 15, 2024

Registration & Continental Breakfast 7:30 a.m.

Seminar 8:00 a.m. – 3:00 p.m. (*Lunch included*)

Atlantis Hotel Casino Spa, Reno
2nd floor Convention Center

Course Outline

7:30 – 8:00 am Check-in & Cont. Breakfast

8:00 – 11:30 pm **Session I & II**

11:30 – 12:15 pm Lunch

12:15 – 3:00 pm **Session III & IV**
Q & A

Hosted by:

Northern Nevada
DENTAL SOCIETY

About the Speaker

Dr. Roda graduated from the Faculty of Dentistry at Dalhousie University in Halifax, Canada in 1981 and maintained a full-time private general practice in Dartmouth, Nova Scotia for ten years. He returned to school at Baylor College of Dentistry in Dallas Texas, and received his Masters of Science (Oral Biology) and Certificate in Endodontics in 1993. He became a Diplomate of the American Board of Endodontics in 1998. Dr. Roda has published and lectured internationally, most recently co-authoring the chapter on non-surgical retreatment in the 13th edition of Pathways of the Pulp. He is Past-President of the American Association of Endodontists, Past-President of the Arizona Dental Association, and is an active member the American Dental Association. Dr. Roda is a Past Associate Editor of the Journal of Endodontics, and is an Endodontic Consultant to the Arizona State Board of Dental Examiners. He maintains a private practice limited to Endodontics in Scottsdale, Arizona.

4 part Course Descriptions:

Endodontic Synopsis:

As new technologies arrive to aid the clinician in endodontic diagnosis, the astute practitioner decides how to implement these technologies in a manner consistent with the science and basic clinical principles of Endodontics.

This 90 minute, clinically oriented presentation will focus on how clinical best practices help to deliver the highest level of confidence in Endodontic diagnosis

- Understand how systematic implementation of a thorough diagnostic process can reduce guesswork and simplify endodontic decision making
- Learn how to perform clinical Endodontic diagnostic procedures efficiently to develop an accurate measure of the status of the tooth
- Develop an evidence based diagnosis using the latest terminology from the American Board of Endodontics

CBCT Synopsis:

Recent advances in three-dimensional imaging technologies have resulted in the ability of clinicians to gain new diagnostic information that has a direct impact on endodontic diagnosis. This clinically oriented, non-sponsored presentation and discussion will help the audience participant to understand why implementation of small field of view cone beam CT (CBCT) images into endodontic diagnosis for their patients.

Learning Objectives: By the end of this presentation, the attendee should:

1. Understand how cone beam CT differs from 2D radiography and know the advantages and disadvantages of this diagnostic modality.
2. Understand how CBCT has affected our understanding of our treatment outcomes
3. Learn the general appearance of normal anatomy and disease entities on small FOV CBCT volumes, and understand the role of an oral radiologist

Treatment Planning Synopsis: For Endodontic Disease

When there is endodontic disease in teeth, the practitioner must first diagnose the cause of the disease and then help the patient to decide on a course of action to remedy the situation. The options would include doing nothing, extraction, non-surgical root canal therapy, and for previously root canal treated teeth, periradicular surgery, and intentional replantation are other options that can be looked at. This scientific and case-based presentation will provide information about the options for treatment to the clinician that will help in formulating a treatment plan that would have the greatest likelihood of long-term success.

Learning Objectives: At conclusion of this clinically oriented presentation, participants should be able to:

- Understand the etiology of endodontic disease
- Apply this knowledge to produce rational treatment planning
- Enhance the prognosis of clinical cases through a variety of useful techniques and methodologies.

Disinfection Synopsis:

This two hour, clinically oriented presentation will focus on how new irrigation technologies, and the latest instruments can be used in concordance with clinical best practices to help deliver the highest level of care possible

- Understand how setting the goal of the prevention and treatment of apical periodontitis changes every aspect of how you will look at endodontic therapy
- Understand how the prognosis changes with an infected versus non-infected root canal space
- Decide between the various new irrigation methodologies to implement thorough canal cleaning and disinfection

AN EXCELLENT COURSE FOR YOU and YOUR DENTAL TEAM

***MEMBERS:** On Thursday evening, 03/14/2024, Dr. Roda will also be presenting at the NNDS General Membership Dinner meeting "Cracked Teeth: A Modern Epidemic?"; see enclosed flyer. If you are a member or a dental team member working for a member dentist you are valued; savings **\$\$ are for you too.**

Your Investment/Cost:

MEMBERS:

ADA/NDA/NNDS or NENDS Dentist, Staff Dentists OR first office person	\$ 300
Member's RDH & Staff (non-dentist)	\$ 150/person
Member Dentist Combo: CE & Dinner meeting *	\$ 325
Member's staff + Dinner Meeting	\$ 195/pp

Non-Members: **

Non-ADA/NDA/NNDS Dentist, Staff Dentist, OR first office person	\$ 500
Non-ADA/NDA/NNDS Additional Staff & RDH (non-dentist)	\$ 255/person

(No combo event pricing offered for non-members, sorry)
