VISA/MasterCard/Discover/American Express ACCEPTED

Advance Reservations REQUIRED BY Monday, 4/5 (Cancellation requires 48-hour notice, or you will be billed)

"TMD RISK ANALYSIS"

Our Guest Presenter:

Lee Ann Brady, DMD

www.leeannbrady.com / www.restorativenation.com

Course description: Every time we alter the chewing surface of a tooth we impact the entire stomatognathic system. Some patients have very low functional risk and a high ability to adapt to the changes we make, other patients present with complex functional and restorative challenges or a low threshold to adapt to change. Whether the complexity is extreme wear, deep bite class two occlusion or a patient with damaged joints moving forward is about assessing the risks and managing them as part of our overall treatment plan. In this program we will explore these and other occlusal challenges and look at how we can make our dentistry more predictable and help our patients stay healthy and comfortable.

Learning Objectives:

- JAMSS Protocol
- 5 Minute JAMSS Risk Assessment
- Joint, muscle and occlusal exam for risk assessment
- SAFE Protocol for preventing TMD Issues

2.5 CEU's
